

```
#include<stdio.h>
int main()
{
    int x=1309;
    //gave p an address to point to
    int *p = &x;
    printf("\n The value of x is = %d",x);
    printf("\n The pointer points to the value = %d\n",*p);
    return 1;
}
```
