

```
#include<stdio.h>
#include<string.h>
#include<malloc.h>
int main(void)
{
    //changed unallocated pointer s to static allocated array
    char s[30], *dyn_s;
    int ln;
    printf("Enter the input string\n");
    scanf("%s",s);
    ln = strlen(s);
    dyn_s = (char*)malloc(strlen(s)+1);
    dyn_s = s;
    dyn_s[strlen(s)]='\0';
    printf(dyn_s);
    return 0;
}
```
